High flow, high capacity commercial under-sink water filter w/Doulton Imperial Ultracarb cartridge model Regent I

Four stage system designed for chemical, microbiological and heavy metals (lead) reduction, bacteriostatic.

Doulton filters, a trusted name in water purification by presidents, kings, queens and millions of discerning homeowners in over 150 countries around the world since 1827.

Reduces up to 99% of soluble lead. Exclusive silver, ceramic, and carbon-block technology reduces >99.99% of particles at 0.9 micron absolute and larger including pathogenic bacteria such as E.coli.

Reduces dirt, chlorine, pesticides, herbicides, organic chemicals, taste, odor, and removes 100% Cryptosporidium and Giardia cysts.

Taste the difference. Everything you make with Doulton water filter will taste outstandingly better.

Cartridge replacement is easy and simple.

An economical alternative to bottled water, reverse osmosis, distillation and ultra-violet technologies.

Specifications:

- Cartridge capacity: 2000 gallons (8000 L)
- Flow Rate: 1.4/5 GPM/LPM @ 45/3 psi/bars for cold water use only
